Ibadan, Nigeria

PROFESSIONAL SUMMARY

Full-Stack JavaScript Developer with hands-on experience building secure, scalable, and responsive web applications using React.js, Node.js (Express), Supabase (PostgreSQL), Firebase, and MongoDB. Skilled in authentication systems, Role-Based Access Control (RBAC), and modern deployment workflows.

EDUCATION

Federal University of Technology, Minna
B.Tech Physics

2021 – 2026
Minna, Nigeria

EXPERIENCE

Fullstack Developer & Technical Lead — CTransit

Feb 2026 – Present

- Technical lead on a student transportation platform, owning all frontend, backend, and architecture decisions.
- Built and shipped the platform end-to-end using React.js, now serving 50+ active student users.
- Designed trip scheduling and booking workflows, iterating directly on user feedback in the absence of a dedicated design function.

Software Developer Trainee — PLP Cohort 4

2025

- Engineered reusable frontend components for collaborative Full-Stack projects using React.js.
- Integrated RESTful APIs and managed asynchronous data fetching with modern JavaScript.

Web Development Intern — CodeSoft

2024

- Developed and deployed dynamic web applications using React.js, focusing on state management and component-based architecture.
- Implemented complex UI designs using Tailwind CSS, ensuring pixel-perfect responsiveness across devices.

Frontend Web Developer — IIIRG

2021 – 2023

- Maintained and enhanced internal web applications, resolving critical frontend bugs and improving user navigation.
- Collaborated with the design team to implement interactive features using JavaScript, increasing user engagement by 15%.

PROJECTS

CBT Center – Computer-Based Testing

React.js, Tailwind CSS, Supabase

 Repo | [Live Demo](#)

Full-Stack Application

- ✓ Deployed to production use at an exam preparation center; received strong positive feedback and testimonials from students.
- ✓ Developed a secure, full-stack exam platform featuring **Role-Based Access Control (RBAC)** for Admin and Student views, with a custom timer engine handling automatic submission and real-time

scoring.

- ✓ Integrated **Supabase Authentication** and PostgreSQL for secure data handling and protected routing.

Dayve Autos – Auto Dealer Website *React.js, Tailwind CSS*

 [Repo](#) | [Live Demo](#)

Frontend Application

- ✓ Built a responsive frontend for an independent car seller using **React.js** and **Tailwind CSS**, showcasing vehicle listings for prospective buyers.
- ✓ Delivered a polished, mobile-first storefront that the client reported gave their business a more credible presence to customers.

TrustLayer *React.js, TypeScript, CSS, Supabase, Gemini 2.5 API*

 [Repo](#) | [Live Demo](#)

Full-Stack Application

- ✓ Built a full-stack application using **React.js** and **TypeScript** with a **Supabase** backend, currently entering user testing.
- ✓ Integrated the **Gemini 2.5 API** to power AI-driven functionality within the platform.

Crop Disease Detection System *React.js, Node.js, Supabase, Plant.ID API*

 [Repo](#) | [Live Demo](#)

Full-Stack Application

- ✓ Built a full-stack agricultural diagnostics app with a **Node.js** backend routing requests to the **Plant.ID API** for automated crop disease detection.
- ✓ Integrated **Supabase** for authentication and database storage, persisting user diagnostic history.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), Typescript, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, RESTful APIs, RBAC
Databases: PostgreSQL (Supabase), MongoDB, Firebase
DevOps/Tools: Git, Docker, Vercel, Netlify

PROFESSIONAL CERTIFICATIONS

- ✓ **Oracle Certified** Foundation Associate
- ✓ **NITDA SIWES** Industrial Training
- ✓ **PLP** Web Development Certificate
- ✓ **Aviatrix** Multicloud Networking
- ✓ **Google** AI Essentials
- ✓ **Udemy** Intro to DevOps
